

BKL SF-3 12/13/05

PATENT

REMARKS

Claims 1-20 remain in the application.

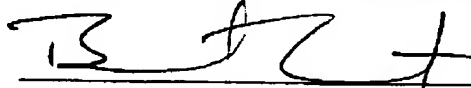

Claims 16 and 17 have been amended to provide proper antecedent basis.

As discussed in a telephone conference with the examiner, claim 12 has been amended to more clearly specify the applicant's intended scope of protection, and should obviate the §102 rejection. Applicant did not intend the examiner's interpretation that "between" includes a lens portion forward (to the right on a horizontal axis of Dickson Fig. 2) of a position between the two light sources, but that there was actual lens material intervening between the two light sources.

All other rejected claims depend from claim 12 and should thus be allowable, and further because of the features set forth therein..

Reconsideration of the application is respectfully requested.

Respectfully submitted,
